TAB F

OFFICIAL (QP) AND PERSONAL AUTOMOBILES

As in the case of furniture, most agents possess, or could possess, an automobile suitable for their local transportation. If an agent is financially unable to do so, we might make a loan with reimbursement to be effected through pay deductions at headquarters over a period of time. Instead of claiming mileage (or gas, oil, repairs, etc) the agent could be given a flat rate monthly allowance (nonaccountable) for the official use of his car, paid, like salary, to his bank account or otherwise at his choice. The monthly rate would vary from place to place, In some cases, \$50 per month should pay for all out-of-pocket expenses as well as amortization of the vehicle. In others, the monthly rate might be much higher (where the life of the car is short because of poor roads, service, etc). Our records of the cost of maintaining official and QP vehicles at most cities in the world should be a satisfactory basis for the establishment of an allowance in most cases.

CONFIDENTIAL
